

Concerns on Proposed Groundwater Development Project

REC'D - BLM - NSO
9:00 SEP 19 2011
A.M.

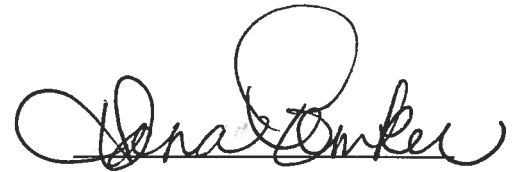

We farm in Delta, Millard County Utah. We own and lease 1700 acres of flood irrigated cropland. Water is vital to the production of our alfalfa hay, corn and grains. We want our young son who is 4 years old to have the option of choosing agriculture as a profession. How far reaching will the impact of this pipeline be?

Our number one question concerning the Southern Nevada Water Project is: If there is water for this project, *'Where is it going today'? Where did it go 10 years ago? Where did it go 100 years ago? 1000 years ago?*

Thank you for your consideration.
